

Living & Environmental Systems and Other Products

Sanden's advanced technologies find application in the home, which is the foundation of our livelihood. In the Living & Environmental Systems business, we develop products with four concepts in mind: pleasantness of the living environment, health, peace of mind, and energy conservation.

EcoCute Products

Water-heating equipment is essential for the living environment. To meet customer needs, Sanden has created a broad lineup of water-heater equipment and systems for providing related services to meet customer needs.

Commercial Store Systems

In the fields of store equipment and vending machines, Sanden plays an important role in supporting the distribution of food products. In addition to the manufacturing and marketing of freezer and refrigerator showcases for use in retail stores, Sanden provides comprehensive support for retail stores by offering planning, design, installation, and maintenance services. In the field of vending machines, Sanden is moving forward with the introduction of IT capabilities and developing products that anticipate the needs of the times.

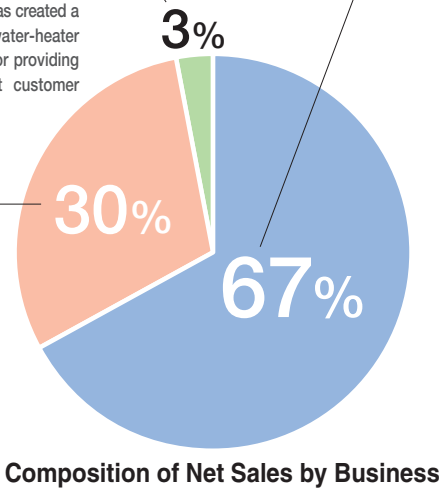

IT-Enabled Vending Systems

Sanden is a leader in the vending machine industry in the introduction of IT capabilities, including units that accept electronic money and point cards.

Store Master

In addition to equipment, Sanden has developed systems that monitor and control temperature throughout retail outlets, thus realizing substantial energy savings.

Automobile Systems

Sanden has taken a long and careful look at the evolution of the automobile and is pursuing the development of next-generation, air-conditioning systems that are friendly to both human beings and the natural environment. Sanden's compressors for use in car air-conditioning systems have been adopted by leading automobile manufacturers around the world, and Sanden is continuing to grow as a leading company in this field.

Air-Conditioning Systems for Electric-Powered Vehicles

Quiet, compact, highly efficient electric-powered compressors, these units are employed in hybrid vehicles where, even when the gasoline engine has been stopped, the air conditioner continues to run on electric power. These units are also drawing attention as key components in air-conditioning systems for fuel cell powered vehicles now under development.

Sanden Global Network

Sanden has 52 business bases in 23 countries around the world and is developing its businesses on a global scale.
